22 March 55

Tom

Reference is made to your letter of 8 March pertaining to "Emergency Waterproof Packaging".

We believe that the material required for this job is commercially available and an extensive development job is not warranted.

A rubber material which meets these requirements is obtainable under Federal specification ZZ-T-416a "Tire and Tube Reconditioning Materials and Equipment" Type II or III.

We are sending you a sample roll of Type III, style 2, tube repair gum, that appears to be the closest to the requirements indicated.

I would suggest that you have the "Agency" responsible examine this material to see if it is what they require.

ORIGINAL CL BY 2345979 is a standard item which  
☐ DECL ☒ REVW ON 30/06/2010

is listed in ORD 5 SNL H-14  
"Tires, Tubes, Tire Repair Material, and  
Related Items; page 13, stock #  
H 014 - 0856795, Ord Part # 33-R-192  
(Note reference to spec 20-120 is absolute  
and should refer to 22-T-416a)  
an alternate material is listed on  
page 12, stock # H.014 - 0856735,  
Ord Part # 33-R-123-25

Either of these materials should be  
readily available at Ordnance depots

Please give me your thoughts  
on this so that I may write you  
officially if you concur with the  
above approach to this problem,

Bob Shaw
